PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 9 years of experience architecting and delivering scalable web applications, SaaS platforms, and e-commerce integrations. Specialized in PHP/Laravel, React, NextJS, Node.js, and cloud infrastructure (AWS, DigitalOcean), with a strong record of building mission-critical systems for globally recognized brands including **Lamborghini, DrinkMate, Roku, and Thrive Market**. Experienced in leading cross-functional teams, managing full development cycles from discovery through deployment, and working remotely with international clients. Eligible for Ireland's Critical Skills Employment Permit and actively seeking full-time roles in Ireland.

PROFESSIONAL EXPERIENCE

Backend Developer (Remote) | Coalition Technologies

2022 – Present · USA · Remote

Coalition Technologies is a leading US-based digital agency delivering web development, SEO, and e-commerce solutions to enterprise clients worldwide.

- Delivered 30+ full-cycle web and e-commerce projects for clients including Lamborghini, DrinkMate, GradWear, Inhaven, Mom's Pantry and Bisect Hosting, achieving on-time delivery rates above 95%.
- Architected and launched 35+ custom Shopify and BigCommerce applications, with 2 published on public marketplaces — driving recurring revenue streams for client businesses.
- Engineered complex ERP/CRM integrations (NetSuite, Salesforce, Celigo) that reduced manual data processing time by an estimated 40% for multiple enterprise clients.
- Led cloud infrastructure setup and ongoing maintenance on AWS (EC2, S3, RDS) and DigitalOcean for 30+ production environments, ensuring 99.9% uptime SLAs.
- Collaborated directly with the Sales team on pre-sales calls and project scoping, producing technical proposals that converted at a higher-than-average rate.
- Conducted regular client-facing meetings, translating complex technical progress into clear business updates and proactively managing expectations.

Senior Full-Stack Engineer & Team Lead | **CoderHand**

2016 – 2022 · Full Time

- Mentored a team of 4 junior developers in deployment practices, server management, system architecture, and client communication — reducing onboarding time by 30%.
- Built bespoke Laravel-based web platforms for SME and enterprise clients across e-commerce, SaaS, and internal tooling verticals.
- Developed React and Vue.js front-ends integrated with RESTful APIs, improving page performance and reducing load times by up to 50%.
- Managed complete project lifecycles — from client discovery workshops and wireframing through to deployment and post-launch support.
- Integrated third-party services including payment gateways, shipping APIs, and CRM platforms, expanding client system capabilities with minimal disruption.
- Maintained PostgreSQL and MySQL databases for high-traffic applications, implementing query optimisation strategies that improved performance by 35%.

KEY PROJECTS & ACHIEVEMENTS

- Designed and shipped a public BigCommerce app now used by 200+ merchants, enabling seamless inventory sync with ERP systems.
- Built a bespoke Shopify checkout extension for a luxury automotive client (Lamborghini dealer network), improving conversion rate by an estimated 18%.
- Architected a bi-directional data sync system between NetSuite ERP, ShipStation, BigCommerce and Shopify using Celigo, eliminating manual order and customer processing for a global client.
- Integrated Claude and ChatGPT APIs into internal developer tools to automate code review summaries and documentation generation, saving ~5 hours/week team-wide.

PREVIOUS PROJECTS

- DrinkMate — Built a Laravel-based inventory management platform for a USA, Canada & European retail SME; integrated with multiple payment gateways and shipping APIs; Build automation between custom app, NetSuite and Salesforce; reduced manual processing time by 35%.
- LN Curtis — Engineered a custom CRM integration between Salesforce, BigCommerce and an internal system; reduced manual processing time by 30%.
- Lea Black Beauty — Designed and deployed an e-commerce headless storefront on Next.js with a Shopify backend for a USA-based skincare brand.
- Inhaven — Built a Laravel-based inventory management platform for a USA, Canada market; integrated with multiple payment gateways and shipping APIs; Build automation between custom app, NetSuite and Salesforce; reduced manual processing time by 25%.
